ICT/IT Infrastructure area /System Integration Services (including IT enabled services), ITMS

Sl. No	Activity	Existing RFP/Corrigenda provision issued from time to time	Clarification
		consortium member should have less than INR 20 crores (10% contribution). The Average Annual Turnover shall be from one of the following specific business areas viz. ICT/IT Infrastructure area /System, Integration Services, ITMS & Video Surveillance/Video management.	& Video Surveillance/ Video management.
6	Vol 2, Page No.318, 10.1. Annexure 1: Bill of Quantity	Mentioned below is the indicative Bill of Material for each proposed project component, however, the below quoted quantity are minimum and MSI is required to access the exact requirement, location wise, for all the proposed solution components and shall accordingly size the hardware and software infrastructure requirement to meet the project objectives and SLA. Bidder can increase the line item/quantity, if required. Proposed quantity should not be less than the Indicative quantity, in any case. Wherever under the indicative quantities "As per requirement" is mentioned, the Bidder has to mention the proposed quantity along with the unit rates in the Price Bid. Bidder has to provide proposed quantity for each line item in Technical Bid and justify as per the solution-requirements during the technical bid evaluation. This quantity and the increased line-item (if any) must be reflected in the Price Bid, failing which the bid may be rejected.	The bidder is not supposed to increase or decrease the line items/quantities or add any new line-item in the Price Bid. As such, the question of furnishing justification for solution requirements, does not arise. However, any increase in the quantity during execution shall be paid on the rates quoted in commercial bid.
7	Vol 2, Page No.79, 5.1.1. Functional & Technical Requirements for ICCC Platform	L. Mobile app Functionalities: Ability to logon/logoff the UPS using an authorized use profile of the system. Ability to change the picture or the password of the user of the mobile app. Ability to view the current Threat Level of the system. Ability to change the current Threat Level of the system. Ability to execute hot actions configured in the user profile. Ability to view below minimum devices Unified with the UC&C platform: i. Cameras ii. ALPR cameras iii. GIS and Offline Maps iv. Ability to navigate the system hierarchical view of the devices & entities with ability to search entities in the system.	UPS here has been used for "Mobile application" and should be read and understood accordingly.
